SIMPLE

CALCULATOR WEB APPLICATION

INTRODUCTION

Objective: Create a simple calculator web application using HTML, CSS, and JavaScript.

Components:

- HTML5 for structure.
- CSS for styling.
- JavaScript for functionality

HTML5 STRUCTURE

HTML Overview:

- **Contains the basic structure for the calculator.**
- **Includes a display area and buttons for numbers and operations.**

CSS STRUCTURE

CSS Overview:

- **Styles the calculator, display and buttons**
- **Adds colors, spacing, and hover effects.**

JS FUNCTIONALITY

JS OVERVIEW

- Functions to append values, clear display, and calculate results.
- Handles user interactions with the calculator

CONCLUSION

- Created a simple calculator using HTML, CSS, and JavaScript.
- Covered the structure, styling, and functionality.
